

PRO-CLEAR 90™

Nonionic Surfactant and Humectant

PRO-CLEAR 90™ is a general purpose, nonionic humectant and surfactant used to enhance spreading and coverage of agricultural sprays. PRO-CLEAR 90 can be used with insecticides, herbicides, fungicides, harvest aids, desiccants, plant growth regulators and foliar-applied nutrients with traditional ground and airblast spray equipment.

PRO-CLEAR 90 provides 2 key attributes that enhance uptake:

- Reduced surface tension to increase spreading and wetting of the spray solution for improved leaf surface coverage
- Humectancy to extend the dry-down time of the spray deposit for longer periods of uptake

PRO-CLEAR 90 is an excellent addition to your spray program and includes additional features:

- Low contact angle for improved spreading and coverage
- Excellent crop safety
- Can be used with a wide range of products and application techniques

Pro-Clear 90 is a trademark of Wedgworth's, Inc.

Application rate

- Ground: 0.5-4 pts./100 gal.

Packaging:

- 2 x 2.5 gallons per case
- 4 x 1 gallons per case
